## Project Design Phase-II Solution Requirements (Functional & Non-functional)

Team Name: Monisha Saranya Ritika Rubha shri

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Objective	The purpose of the system is to detect early gas leakage
		in the industries through the gas pipelines and alert the
		user with their location.
FR-2	Focus	To alert the user immediately if any gas leakage is
		sensed.
FR-3	Features	Gas leakage level will be indicated by the LED lights. It
		detects the different harmful gases like methane, LPG
		etc., by using the required sensors. It updates the
		sensor parameters in web applications.
FR-4	Essentiality	To prevent the industry workers from being exposed to
		toxic gases.
FR-5	Gas leakage location sent	Location sent to the web application through GPS
		module.

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The web application is simple and easy to use. Efficiency is high.
		, ,
NFR-2	Security	The application runs accurately.
NFR-3	Reliability	The application can be accessed at anytime and anywhere
NFR-5	Availability	The web application is highly secure. Software is protected from unauthorized access
NFR-6	Scalability	Application is not limited to the users.
